WORK EXPERIENCE

Parker Work Systems S.L. (Spain) - Software Developer

March 2025 - February 2026

- Implemented new business features and enhancements for a production ERP platform.
- Maintained and optimized legacy PHP applications, reducing technical debt through continuous refactoring.
- Participated in the migration from a legacy frontend to React, Next.js, and Tailwind CSS, adopting modern development practices.
- Fixed production issues and delivered reliable solutions in collaboration with cross-functional teams.
- Developed a collaborative real-time chat feature within the ERP, enabling employees to communicate directly from the platform.

Hospital General Universitario Reina Sofía (Spain) - IT Technician

March 2023 - June 2023

- Supported network-connected medical devices and peripheral equipment.
- Performed software installations, system updates, and preventive maintenance to maintain the reliability and security of IT equipment.
- Diagnosed and resolved technical incidents, ensuring minimal disruption to daily hospital operations.
- Installed, configured, and maintained desktop computers, laptops, printers, and peripheral devices across multiple hospital departments.
